SOUTH VETERANS PARKWAY NEIGHBORHOOD MEETINGS SUMMARY

WHAT WE HEARD

Meetings were hosted at Spirit of Peace Church with approximately 110 people attending across the four nights. Twenty-four written comments were received with an additional five comments submitted online after the meetings.

Comment themes:

- What is being done to address safety concerns (i.e. speed limit, drainage, keeping vehicles from exiting the roadway and going into private properties)
- Can the parkway be relocated farther to the South?
- Is there room for the parkway between existing buildings?
- What can be done to mitigate sound, light, and noise?
- Has everything been done to lessen the impact to the surrounding homes?
- How will this project impact property values/sale-ability of homes?
- Where will the walking trail be located?
- Homeowners not informed of project at time of purchase.
- Does the higher cost per mile of building in a residential area versus a more open field justify the placement of South Veterans Parkway?

Next Steps:

- Environmental Assessment currently being updated
- Noise study in progress
- Review need for visual impacts study
