

SOUTH VETERANS PARKWAY PROJECT OVERVIEW

Project Overview

Design and construction for South Veterans Parkway is underway. In 2020, the South Dakota Transportation Commission approved the plans to complete construction of the remaining 8.7 miles that make up the southern section of Veterans Parkway from Interstate 29 to 57th Street.

When connected to the northern segment of Veterans Parkway, the additional roadway will support a regional arterial road network around southeast Sioux Falls. This project — the final stage in connecting I-29 with I-90 — will accommodate growing transportation needs across the corridor and help prepare the greater Sioux Falls area for continued vibrant growth and development.

Project Benefits

Reduces overall traffic congestion throughout the City of Sioux Falls

Improves accessibility throughout the Sioux Falls regional transportation network, especially in southern and eastern Sioux Falls

Provides safer routes and crossings for pedestrians and bicyclists

Helps meet future transportation needs resulting from regional growth

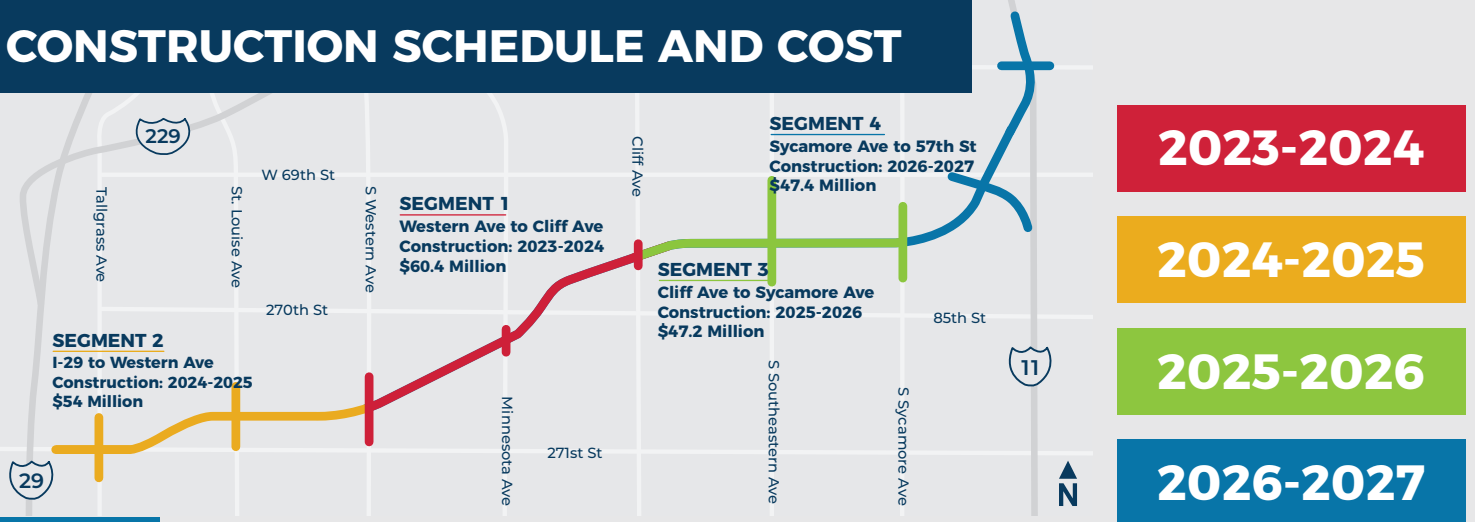

Accommodates public and private investments

CONSTRUCTION UPDATE

The section of new road from Western Avenue to Cliff Avenue will be constructed first starting in June 2023 through 2024. The other three segments of the project are still being designed. Construction work with traffic impacts will occur on Cliff Avenue and Minnesota Avenue near the new South Veterans Parkway in 2023 and on Western Avenue in 2024.
